SUMMARY

Software Developer skilled in backend development, Spring Boot, REST APIs, JDBC, JPA/Hibernate, Spring Security, and database management. Strong foundation in OOP and multithreading, with additional knowledge of Python, machine learning, and cloud infrastructure. AWS Certified Cloud Practitioner.

EDUCATION

B.E. in Artificial Intelligence and Data Science *2023 – 2027*
Datta Meghe College of Engineering, Airoli, Navi Mumbai
CGPA: 9.25

12th HSC Science *2021 – 2023*
Ramanand Arya D.A.V. College, Bhandup, Mumbai
Percentage: 79.33%

SKILLS

Programming: Java, Python, SQL
Software Development: Spring Boot MVC, REST APIs, JPA/Hibernate, Spring Security, React.js
Data Science: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow
Databases: MySQL, PostgreSQL, MongoDB
Cloud & Tools: AWS (EC2, S3, IAM, VPC, RDS), Docker, Linux, Git

EXPERIENCE

Python Developer Inter | CODTECH IT SOLUTIONS *May 2025 – July 2025*

- Developed Python and Flask applications by implementing backend features, writing application logic, and resolving bugs.
- Implemented assigned functionality and tested changes to improve application reliability and maintainability.
- Used Git for version control to track code changes, manage updates, and maintain development progress.
- Reviewed existing codebases, identified issues, and implemented targeted improvements to application efficiency.

PROJECTS

TRACEZERO – Metadata Privacy Firewall GitHub
Java, JavaFX, MVC Architecture, File System APIs

- Built a Java/JavaFX app to scan and sanitize hidden metadata across PDFs, DOCX, ZIPs, and images.
- Implemented JSON/DAT persistence (LogManager, ReportGenerator) for operational logs, stats, and history reports.
- Designed a responsive FXML/CSS multi-view interface for scanning, cleaning, configuration, and reporting.

Knowledge Copilot – RAG Document Intelligence System GitHub
Python, FastAPI, Qdrant, BM25, RRF, Cross-Encoder, SQLite

- Designed a hybrid retrieval pipeline combining BM25 and vector search with Reciprocal Rank Fusion and cross-encoder reranking to improve document retrieval relevance.
- Built document ingestion and chunking pipelines with embedding generation, metadata storage, and REST APIs for document indexing and retrieval.

Client Management System – Full-Stack Web Application GitHub
Java, Spring Boot, React.js, MySQL, REST APIs

- Developed RESTful APIs and React components to manage client records, documents, and multi-location branch operations.
- Designed relational database schemas for hierarchical client records, document workflows, and multi-entity relationships.

Gemma-3 1B LoRA Fine-Tuning GitHub
Python, Jupyter Notebook, LoRA, LLMs

- Fine-tuned the Gemma-3 1B instruction-tuned model using LoRA for parameter-efficient adaptation.
- Engineered a Jupyter Notebook training pipeline to execute selective model weight updates.

CERTIFICATIONS

AWS Certified Cloud Practitioner *Dec 2026*
Google Advanced Data Analytics Professional Certificate *Jan 2026*
